SOUTH AFRICA'S DEALERSHIP OS

| INTERNATIONAL BUSINESS PLAN · CONFIDENTIAL

The **AI-Powered** Dealership Operating System for Emerging Markets

A strategic plan for scaling GrayArx from South Africa's leading dealership AI platform to the dominant dealership operating system across Sub-Saharan Africa, MENA, Southeast Asia, and Latin America — capturing a >\$2 billion addressable market.

Executive Summary

GrayArx is South Africa's first AI-powered Dealership Operating System — a single platform that replaces the fragmented stack of CRMs, call centres, and manual follow-up processes that cost dealerships millions in lost leads every year. Seven specialised AI agents handle sales, prospecting, email, WhatsApp, invoicing, auditing, and follow-up — around the clock, 365 days a year.

THE PROBLEM

South African car dealerships lose an estimated **60–70% of inbound leads** that arrive outside business hours. A prospect who messages a dealership at 9 PM on a Sunday receives silence — and buys from a competitor by Monday morning. This is not a people problem; it is a structural one. Dealerships simply cannot afford to staff 24/7 sales coverage.

The same dynamic plays out in every emerging market from Lagos to Jakarta: WhatsApp is the primary business channel, digital infrastructure lags behind consumer demand, and dealerships have no scalable way to capture and nurture leads at the speed customers expect.

THE SOLUTION

GrayArx deploys a fleet of AI agents that respond instantly, qualify leads, book test drives, send pre-approval links, and follow up persistently — all through WhatsApp, webchat, and email simultaneously. A dealership using GrayArx never loses a lead to after-hours silence again.

CURRENT TRACTION

GrayArx is currently in active pilot phase, onboarding its first cohort of South African dealerships via a zero-commitment 7-day free trial. The platform is live with WhatsApp integration (Meta Cloud API), webchat, email agents, vehicle inventory management, lead tracking, and booking functionality. All data handling is POPIA-compliant.

THE VISION

South Africa is the proving ground. The real opportunity is the 50,000+ car dealerships across Sub-Saharan Africa, MENA, Southeast Asia, and Latin America — all operating in WhatsApp-first economies, all underserved by legacy US-built CRM tools, and all facing the same after-hours lead crisis. GrayArx will become the **global dealership OS for emerging markets**, the same way Shopify became the commerce OS for SMEs worldwide.

Market Opportunity

SOUTH AFRICA — HOME MARKET

South Africa's automotive retail industry is one of the largest on the African continent, generating over **R400 billion** in annual turnover. There are more than **11,000 registered dealerships** across the country, ranging from large franchise groups (Motus, WeBuyCars, Unitrans) to independent township dealers.

GrayArx's initial target segment is the **500 highest-density dealerships** in Gauteng, the Western Cape, and KwaZulu-Natal — the three provinces that account for roughly 70% of new and used vehicle sales. These dealerships share a common pain: digital-savvy consumers who message via WhatsApp and expect instant responses, met by dealerships still relying on salespeople and voicemail.

TAM (South Africa): 11,000 dealerships × avg R5,000/month = **R660M ARR potential** in South Africa alone.

PHASE 2 — SUB-SAHARAN AFRICA

Beyond South Africa, Sub-Saharan Africa presents a compellingly underserved market. Nigeria alone has an estimated 4,000+ used-car dealers; Kenya's car market is growing at double digits annually; Ghana, Tanzania, and Zambia are emerging hubs. These markets share three key characteristics that make them ideal for GrayArx:

- **WhatsApp-first:** WhatsApp is used for business transactions, customer service, and sales by default
- **Minimal existing infrastructure:** No dominant CRM or DMS has captured these markets
- **Mobile-first consumers:** Buyers expect instant mobile responses; gaps in service are commercially costly

PHASE 3 — MENA, SOUTHEAST ASIA & LATIN AMERICA

The MENA automotive market exceeded \$200 billion in 2025. Southeast Asia — Indonesia, Vietnam, Thailand — represents a further 500,000+ car transactions annually with WhatsApp as the dominant communication layer. Brazil and Mexico together account for over 4 million new vehicles sold per year, with WhatsApp the primary sales channel for used cars.

PHASE	REGION	TIMELINE	EST. ADDRESSABLE DEALERSHIPS
PHASE 0	South Africa	2025–2026	11,000+
PHASE 1	Nigeria, Kenya, UAE	2027	10,000+
PHASE 2	Egypt, Morocco, Indonesia	2028	25,000+
PHASE 3	India, Brazil, Mexico	2029	90,000+

Global TAM (WhatsApp-first emerging markets): 136,000+ dealerships × avg \$200/month USD = **>\$326M ARR potential** — and that's before enterprise and revenue-share models.

International Expansion Strategy

GrayArx's international expansion follows a disciplined, evidence-based sequencing. South Africa is not just the home market — it is the **proof-of-concept lab**. Success metrics from SA pilots (lead-to-booking conversion lift, after-hours response rates, churn, NPS) become the credibility collateral that opens doors in every subsequent market.

TIER 1 TARGETS — YEAR 1–2 (POST-SA VALIDATION)

NG Nigeria

- Largest car market in West Africa
- 4,000+ registered dealers, mostly independent
- WhatsApp is the primary commercial channel
- Minimal digital infrastructure = massive gap
- Lagos + Abuja initial focus
- Flutterwave/Paystack for payment processing

KE Kenya

- Most tech-forward economy in East Africa
- Nairobi as Africa's premier tech hub
- M-Pesa ecosystem — seamless payment rails
- Growing middle class driving used-car demand
- English-first market (minimal localisation cost)
- Strong VC ecosystem for partnership

AE UAE / Dubai

- Luxury car capital of MENA — highest per-capita car spend globally
- Multicultural, English + Arabic business environment

- High tech adoption among dealerships; appetite for AI tools
- Gateway to broader GCC: Saudi Arabia, Qatar, Kuwait
- USD-denominated market — strong revenue per seat
- WhatsApp business adoption near-universal among dealers

TIER 2 TARGETS — YEAR 2-3

COUNTRY	KEY RATIONALE	MARKET SIZE	LOCALISATION PRIORITY
EG Egypt	100M population; fastest-growing MENA auto market	~8,000 dealers	Arabic agent language
MA Morocco	Gateway to North + Francophone Africa; EU proximity	~3,500 dealers	French + Arabic agents
ID Indonesia	270M people; WhatsApp- dominant; massive used-car market	~15,000 dealers	Bahasa Indonesia agents

TIER 3 TARGETS — YEAR 3–5 (SCALE MARKETS)

COUNTRY	KEY RATIONALE	MARKET SIZE	LOCALISATION PRIORITY
IN India	20,000+ dealerships; digital-first post-COVID; massive scale	20,000+ dealers	Hindi + regional language agents
BR Brazil	8th largest car market globally; WhatsApp-dominant economy	~30,000 dealers	Portuguese agents
MX Mexico	Proximity to US market; LATAM Spanish gateway	~12,000 dealers	Spanish agents (shared with LATAM)

LOCALISATION FRAMEWORK

Each market entry follows a standardised localisation checklist, keeping marginal expansion cost low while ensuring cultural fit:

COMPONENT	SA (BASELINE)	NIGERIA / KENYA	UAE	INDONESIA
Agent language	EN / Zulu / Afrikaans	EN / Pidgin	EN / Arabic	Local languages
Currency	ZAR (R)	NGN / KES	AED	IDR / BRL
Payment	PayFast / Peach	Flutterwave / M-Pesa	Stripe / local	GoPay / PIX
Data law	POPIA	NDPA / DPA (KE)	PDPL (UAE)	PDPLaw / LGD
WhatsApp API	✓	✓	✓	✓

Strategic advantage: Because GrayArx is built on Meta's Cloud API (WhatsApp Business Platform), the core communication infrastructure works identically in every country. Localisation is primarily language, currency, and payment rails — not infrastructure rebuilds. This makes each new market cheaper to enter than the last.

Go-to-Market Strategy

THE PILOT FLYWHEEL

GrayArx's primary acquisition engine is the **7-day free pilot**. A dealership onboards with zero friction, zero credit card, and zero technical setup. Within 48 hours they see AI agents responding to real leads. The emotional shift — watching a bot close a booking at 2 AM — is the most powerful sales tool in the arsenal.

DAY 0

Onboarding

Dealer signs up, connects WhatsApp number, imports vehicle inventory via CSV. Setup takes under 30 minutes.

DAY 1-3

Live agents activated

Nala (webchat), Bongi (WhatsApp), and Lerato (email) go live. Sipho begins outbound prospecting on the dealer's behalf. All interactions logged to the dashboard.

DAY 4-6

Proof accumulates

Dealer receives weekly report: leads captured after hours, bookings made, messages handled. Kagiso (audit agent) surfaces insights and ROI estimates.

DAY 7

Conversion conversation

Sales team contacts the dealer with personalised data. Pilot dealerships that saw at least one after-hours booking convert at high rates — the evidence does the selling.

ACQUISITION CHANNELS

Direct Outreach (Primary)

Content & Social Proof

- **Sipho** (GrayArx's own prospecting AI) runs outreach campaigns targeting dealership GMs and principals via WhatsApp and email
- LinkedIn outreach to dealership groups and automotive associations
- Cold WhatsApp campaigns (compliant, opt-in structured)

Partnership Channel

- **Automotive groups:** Motus, Unitrans, WeBuyCars — enterprise agreements unlock multi-branch rollouts
- **DMS providers:** Integration partnerships with DealerFloor, DMS Africa — GrayArx rides their install base
- **Finance houses:** WesBank, Standard Bank Vehicle Finance — referral pipeline from their dealer networks

- SA case studies published on LinkedIn and automotive forums
- Video testimonials from pilot dealers ("we closed 3 deals on a Sunday")
- WhatsApp demo bot — prospects can talk to Bongzi before committing

International Expansion GTM

- SA success data → international credibility deck
- Country managers hired locally (cultural fluency critical)
- Attend automotive expos: Automechanika (Dubai, Frankfurt), West Africa Automotive Show
- Partner with local fintech/payment providers who have dealer relationships

KEY METRICS TO TRACK

METRIC	TARGET (SA PILOT PHASE)	TARGET (SCALE PHASE)
Pilot → Paid Conversion	>40%	>55%
Monthly Churn (paid)	<6%	<3%
CAC (direct outreach)	<R8,000	<R5,000
LTV (Growth tier avg)	R78,000 (12mo)	R156,000 (24mo)
LTV:CAC Ratio	>9x	>20x
After-hours lead capture lift	>3x baseline	>4x baseline

SECTION 05

Revenue Model & Pricing

GrayArx operates a SaaS subscription model with three tiers, priced in ZAR for South Africa and USD for international markets. A future revenue-share product on financed deals is planned for Year 3 once sufficient transaction volume exists.

STARTER · PILOT

Free

7-day trial, then R2,500/mo · \$150/mo
USD

- ✓ Revenue share on financed deals

REVENUE STREAMS

STREAM	DESCRIPTION	AVAILABILITY	REVENUE POTENTIAL
SaaS Subscriptions	Monthly recurring per dealership	Live	Primary revenue (80%+ of ARR)
Onboarding Fees	One-time setup for Enterprise	Live	R5,000–R25,000 per deal
Revenue Share (Finance)	% of financed deal value referred via AI	Year 3	High-margin, high-value
Inventory Marketplace	Cross-border vehicle matching (future)	Year 4+	Transaction fee model
Data & Analytics	Market insights sold to OEMs/finance houses	Year 3+	R500K–R5M annually per partner

Competitive Landscape

GLOBAL COMPETITORS

The global automotive CRM space is dominated by US-built platforms designed for American dealerships on American infrastructure. None of them are WhatsApp-native. None of them are built for markets where electricity and data infrastructure are inconsistent. None of them cost less than \$800/month before add-ons.

FEATURE	GRAYARX	ELEAD CRM	DEALERSOCKET	VINSOLUTION
WhatsApp-native	✓	✗	✗	✗
AI agents (autonomous)	✓	✗	✗	✗
24/7 lead response	✓	✗	✗	✗
Emerging market pricing	✓	✗	✗	✗
SA / Africa ready	✓	✗	✗	✗
POPIA / local compliance	✓	✗	✗	✗
Vehicle inventory built-in	✓	✓	✓	✓
Entry price (per dealer)	R2,500/mo	~\$500+/mo	~\$600+/mo	~\$700+/mo

SOUTH AFRICAN MARKET

There is currently **no direct competitor** in South Africa combining AI agents, WhatsApp integration, and inventory management in a single platform at an accessible price point. The closest alternatives are:

- **AutoTrader SA / Cars.co.za:** Listing portals, not a dealership OS. They generate leads but do not manage them.
- **Salesforce / HubSpot:** Generic CRMs not configured for automotive. Expensive. No WhatsApp automation. Requires substantial implementation cost.
- **Local DMS providers (DMS Africa, DealerFloor):** Back-office systems focused on stock and accounting, not AI sales agents.

First-mover advantage is real and time-limited. GrayArx has an 18–24 month window to establish network effects and customer lock-in before better-funded competitors discover this gap. Speed of execution is the moat.

DEFENSIBLE MOATS

Data Network Effects

Every conversation, every lead, every booking trains GrayArx's models on African automotive buyer behaviour — data no US competitor can replicate.

WhatsApp-Native Architecture

Built from day one on Meta Cloud API. Retrofitting WhatsApp into legacy CRMs is painful; replicating a WhatsApp-first platform is a 12+ month engineering project.

Multi-Agent Coordination

Seven AI agents that hand off leads between each other (Bongi → Lerato → Mia → Thandi) create a workflow that single-agent systems cannot match.

Local Relationships

SA automotive is a relationship-driven industry. GrayArx's team understands the culture, speaks the language, and knows the gatekeepers at major dealer groups.

Technology & AI Roadmap

CURRENT PLATFORM (LIVE)

GrayArx is a full-stack web application with the following live components:

Nala

WEBCCHAT SALES AGENT

Handles website visitor conversations, qualifies leads, books test drives, and captures contact details.

Bongi

WHATSAPP SALES AGENT

24/7 WhatsApp responder via Meta Cloud API. Handles enquiries, sends vehicle details and photos, books appointments.

Lerato

EMAIL AGENT

Manages inbound email leads, sends personalised vehicle proposals, follows up on enquiries automatically.

Kagiso

AUDIT & ROADMAP AGENT

Analyses dealership performance, surfaces gaps, generates actionable improvement roadmaps for management.

Sipho

PROSPECTING AGENT

Outbound prospector — identifies and contacts potential GrayArx dealership clients on behalf of the sales team.

Mia

LEAD FOLLOW-UP AGENT

Re-engages cold or inactive leads with personalised follow-up sequences across WhatsApp and email.

Thandi

INVOICING AGENT

Generates and sends invoices, processes payment confirmations, manages financial document workflows.

PRODUCT ROADMAP

Q3 2026 — NOW

WhatsApp Production Webhook + Voice Agent (Themba)

Replace Cloudflare tunnel with production HTTPS webhook on grayarx.com. Launch Themba, an AI voice agent for inbound calls — the last major channel for dealerships.

Q4 2026

Deal Scoring & Predictive Inventory

ML model scoring each lead's purchase probability based on engagement, vehicle viewed, finance pre-approval status, and historical conversion data. Predictive restock recommendations.

Q1 2027

International Multi-Language Agents

Language packs for Yoruba/Pidgin (Nigeria), Swahili (Kenya), Arabic (UAE/Egypt), and Bahasa Indonesia. Agents switch language dynamically based on customer input.

Q3 2027

Computer Vision — Vehicle Condition AI

Dealers upload vehicle photos; AI assesses condition, identifies damage, suggests reconditioning priority, and auto-populates condition reports for buyers.

2028

Cross-Border Inventory Marketplace

GrayArx-connected dealerships can list vehicles visible to buyers across markets. Transaction facilitation via integrated finance and logistics partners. Revenue-share model.

INFRASTRUCTURE & SECURITY

Architecture

- Node.js / TypeScript backend
- React frontend (SPA)
- PostgreSQL + Redis
- Meta Cloud API (WhatsApp)

Compliance & Security

- POPIA compliant (SA) — data residency in SA
- End-to-end TLS for all webhook traffic

- OpenAI API (LLM layer)
 - Resend (transactional email)
 - Webhook signature verification (Meta HMAC-SHA256)
 - Role-based access control per dealership
 - Audit logging for all AI agent actions
 - GDPR-ready architecture for EU market entry
-

Financial Projections

The following projections are based on conservative assumptions: a 40% pilot-to-paid conversion rate, 4% monthly churn, and a blended average revenue per dealer of R6,250/month (SA) and \$280/month USD (international). These figures assume no enterprise deals and no revenue-share income — both upside scenarios.

3-YEAR ARR SUMMARY

YEAR	SA DEALERSHIPS	INTERNATIONAL DEALERSHIPS	TOTAL DEALERSHIPS
Year 1 (2026)	50	0	50
Year 2 (2027)	200	30	230
Year 3 (2028)	500	150	650

DETAILED YEAR-BY-YEAR P&L ESTIMATE

LINE ITEM	YEAR 1 (2026)	YEAR 2 (2027)	YEAR 3 (2028)
SaaS Revenue	R3,750,000	R17,200,000	R60,500,000
Onboarding / Setup Fees	R250,000	R800,000	R4,500,000
Total Revenue	R4,000,000	R18,000,000	R65,000,000
OpenAI / LLM API costs	(R400,000)	(R1,800,000)	(R5,200,000)
Infrastructure (hosting, DB, CDN)	(R180,000)	(R600,000)	(R1,500,000)
WhatsApp API & messaging costs	(R120,000)	(R480,000)	(R1,200,000)
Personnel (engineering + CS)	(R1,800,000)	(R5,400,000)	(R14,000,000)
Sales & marketing	(R600,000)	(R2,400,000)	(R7,000,000)
International expansion costs	(R0)	(R1,500,000)	(R5,000,000)
G&A (legal, compliance, admin)	(R300,000)	(R700,000)	(R1,800,000)
EBITDA	(R600,000)	R5,120,000	R29,300,000
EBITDA Margin	-15%	+28%	+45%

Key assumption: Year 1 is investment-heavy — the pilot fleet is being built, and marketing is front-loaded. Profitability is expected from Month 18 onwards. Year 3

EBITDA margin of 45% reflects the inherent leverage of a SaaS model at scale with AI replacing headcount that would otherwise be required for 24/7 coverage.

Team & Execution

CURRENT TEAM

Founder — Technology & Product

Built GrayArx end-to-end: full-stack architecture, AI agent design, WhatsApp integration, inventory system, and go-to-market strategy. Deep understanding of the South African automotive market and the technical complexity of building on emerging-market infrastructure. Currently leading product, engineering, and early sales.

IMMEDIATE HIRES (SEED ROUND)

ROLE	PRIORITY	MANDATE	EST. COST (ANNUAL)
Head of Sales (SA)	CRITICAL	Own pilot-to-paid pipeline; build and manage SDR team; target 50 paying dealers in 12 months	R600K–R900K + commission
Customer Success Lead	CRITICAL	Onboard pilot dealerships, reduce churn, gather case studies, drive expansion revenue	R480K–R720K
Senior Full-Stack Engineer	HIGH	Scale infrastructure, build voice agent (Themba), own international localisation sprints	R720K–R1.1M
Country Manager — Nigeria	YEAR 2	Establish Lagos presence, sign first 10 Nigerian dealers, manage local partnerships	\$36K–\$54K USD
Country Manager — UAE	YEAR 2	Dubai office establishment, enterprise dealer group relationships, GCC expansion	\$60K–\$90K USD

ADVISORS NEEDED

- **Automotive industry veteran** — access to dealer group principals and OEM relationships
- **Africa tech investor / operator** — network in Lagos, Nairobi, Cairo ecosystems

- **AI/ML technical advisor** — guidance on model fine-tuning, cost optimisation, and multimodal roadmap
- **Legal & compliance (multi-jurisdiction)** — POPIA, GDPR, NDPA, PDPL navigation

EXECUTION MILESTONES

MILESTONE	TARGET DATE	SUCCESS CRITERIA
10 paying SA dealerships	Q3 2026	Avg MRR ≥ R6,000; churn < 10%
Production webhook live	Q3 2026	grayarx.com/api/webhooks — 99.9% uptime
Voice agent (Themba) beta	Q4 2026	5 dealers on voice; >80% call resolution rate
50 paying SA dealerships	Q1 2027	R3.75M ARR run rate
First Nigeria pilot	Q2 2027	5 Lagos dealers in pilot
First UAE enterprise deal	Q3 2027	1 enterprise group, ≥5 branches
200 paying dealers globally	Q4 2027	R18M ARR; EBITDA positive

Funding & Use of Capital

GrayArx is raising pre-seed/seed capital to fund the SA market capture phase and prepare the platform for international expansion. The company is not raising out of desperation — the product works, the market is validated, and the founding team can bootstrap further if needed. Capital is a growth accelerator, not a survival mechanism.

SEED ROUND — R5 MILLION

Purpose: 12-month runway for SA market capture and production infrastructure hardening.

USE OF FUNDS	ALLOCATION	AMOUNT	RATIONALE
Sales & Marketing	30%	R1,500,000	Sales hire, outbound campaigns, dealer events, content
Engineering & Product	25%	R1,250,000	Senior engineer hire, voice agent, infrastructure upgrade
Customer Success	15%	R750,000	CS hire, onboarding tooling, churn reduction
Operations & Legal	12%	R600,000	POPIA legal review, company structure, international trademark
Infrastructure & API costs	10%	R500,000	12 months of cloud, OpenAI API, WhatsApp API at 50-dealer scale
Founder runway & reserves	8%	R400,000	Working capital buffer
Total Seed	100%	R5,000,000	12-month runway to 50 paying dealers and Series A readiness

SERIES A ROUND — R25 MILLION

Purpose: International expansion into Nigeria, Kenya, and UAE, plus engineering scale for voice, vision, and predictive AI layers.

USE OF FUNDS	ALLOCATION	AMOUNT
International market entry (3 countries)	35%	R8,750,000
Engineering (voice, vision, ML pipeline)	25%	R6,250,000
SA market acceleration (200 dealers)	20%	R5,000,000
Localisation & compliance (3 new jurisdictions)	10%	R2,500,000
Reserves & working capital	10%	R2,500,000
Total Series A	100%	R25,000,000

WHY INVEST IN GRAYARX NOW

The timing is right

AI agent costs have collapsed 10x in 18 months. WhatsApp Business API is mature, reliable, and global. The gap between what dealerships need and what exists has never been larger. GrayArx is the first mover to assemble these pieces in a coherent product.

The model works

The platform is live. Agents are responding. Leads are being captured. The unit economics are favourable before any optimisation. Revenue is contractually recurring. This is not a science project — it is a business in motion.

Emerging markets first

Defensible at scale

US CRM companies will not serve Nigeria or Indonesia well. Those markets require local knowledge, local language, local payment rails, and a local team. GrayArx is building that from South Africa outward, with Africa as the moat.

Every conversation makes the AI smarter. Every dealership that joins strengthens the network. Every country entered builds data no competitor can buy. The moat deepens with every month of operation.

GrayArx is not building a feature. It is building the operating system for car dealerships in the world's fastest-growing markets — powered by AI that never sleeps, speaks every language, and works on WhatsApp.

For investment enquiries, partnerships, or pilot access — contact the founding team via the GrayArx platform at grayarx.com.
